About Palladyne AI Corp.

Palladyne AI Corp. (NASDAQ: PDYN) is a U.S.-based technology company delivering collaborative autonomy solutions, advanced avionics, precision-manufactured components, autonomous systems, and advanced UAV engineering services for defense and industrial markets. For more information on Palladyne AI, please visit www.palladyneai.com.

About Palladyne AI

Palladyne AI (NASDAQ: PDYN) is an American technology company delivering embodied artificial intelligence that allows autonomous systems to sense, decide and act in real-world environments. Through Palladyne Defense, the Company supports national security and public safety missions by providing advanced autonomy through IntelliSwarm, a defense-optimized capability that combines SwarmOS edge-based autonomy software with mission-grade avionics to coordinate unmanned aerial systems (UAS) with human oversight. Palladyne Defense also integrates rapid aerospace design and U.S.-based manufacturing to deliver software, components, subsystems and loitering munitions systems aligned with the Department of War's growing demand for cost-effective, rapidly deployable and domestically produced defense technologies. In parallel, Palladyne Commercial applies the same core AI foundation to industrial and unmanned applications through its IQ and Pilot products and UAV engineering services, helping customers improve efficiency, safety and operational performance. With a vertically integrated model and multiple paths to value creation, Palladyne AI is emerging as a new mid-tier technology prime, bridging innovative autonomy, practical engineering and American production to bring intelligent systems into active service.
